

Strategic Energy and Sustainability Services

Fosterra provides independent expertise to support companies on their journey toward assertive sustainability goals. We work closely with your team to sort through competing priorities, operational impacts, and external requirements to establish a roadmap with forward-thinking targets and a vetted project list to reach your goals. We offer a variety of market-tested services that will make a positive impact on Scope 1, 2, and 3 emissions well before 2030.

Strategic Sustainability Planning

- Build alignment and capacity across the organization for sustainability efforts.
- Establish internal and external targets that meet or exceed your sector and peers.
- Develop a realistic multi-year roadmap in alignment with SBTi and TCFD guidance.

Operational Energy and Cost Savings

- Understand energy usage drivers and GHG footprint for all sites and scenarios.
- Identify, evaluate, and prioritize projects with input from internal & external experts.
- Determine operational impact, costs, savings, benefits, and financing options.

Sustainable Supply Chain Programs

- Deploy an award-winning model for supplier engagement and environmental actions.
- Strengthen relationships with supply chain partners, co-manufacturers, and logistics.
- Achieve reportable reductions in hard-to-reach Scope 3 emissions.

Electric Vehicle Transition

- Create scenario-based forecasts for EV adoption and charging infrastructure needs.
- Understand EV impacts to site load and GHG reduction benefits.
- Evaluate options and financial impact for fleet electrification and funding sources.

Specialty Focus Areas

Fosterra has demonstrated experience across a wide array of sectors, technologies, and locations.

- Consumer packaged goods, beverages, manufacturing, and professional services
- Small, medium, and large multi-national companies
- US, Europe, and Asia project evaluations plus South America and Africa with partners
- Global operations experience and collaborative supply chain engagement
- On-site solar, storage, geothermal systems, electric vehicles, and grid renewable programs
- SBTi target setting, climate risk assessment, carbon neutral certification support
- Project financing analysis with support for utility, state, and federal funding opportunities
