

Fosterra builds collaborative partnerships to enable projects that improve our environment, reduce risks, and enhance organizational capabilities. We bring the latest best practices and vetted programs to your stakeholders and customize an approach that fits your goals and budget.

## Renewable Energy Community Planning

- Accelerate the transformation to carbon-free renewable energy.
- Meet climate action goals while strengthening the local/regional economy.
- Understand renewable options, siting, and financial impacts to the community.

## Building Electrification Planning

- Understand the energy usage and footprint of buildings in the community by type.
- Evaluate options for beneficial electrification and cost implications.
- Develop programs for distributed energy resources and climate smart buildings.

## Electric Vehicle Infrastructure Planning

- Create scenario-based forecasts for EV adoption and charging infrastructure needs.
- Understand EV impacts to overall utility load and potential grid locations.
- Evaluate the financial impact of EV programs for drivers and policymakers.

## Resilient Infrastructure for Stronger Communities (RISC)

- Identify infrastructure risks to the local economy and community, by sector.
- Document and prioritize projects to improve resilience and promote sustainable growth.
- Build support for action and investment.

## What support and funding is available?

*There are many funding sources available to you. We will help develop a compelling application!*

- **EECBG funding** for planning and assessments
- **US EPA and DOE funding** opportunities for planning and infrastructure
- **US Economic Development Agency** funding opportunities
- **Local/Regional** economic development and planning organizations
- **State** energy, climate, resilience, and infrastructure planning funds
- **Municipal budgets** for public works, emergency management, and climate action
- **Utility** programs and demonstration projects
